

Partnership Opportunity: Earn While Empowering Others

A Rare Opportunity That Won't Last

Imagine earning significant income while helping people transform their lives through education. Imagine gaining professional experience, building your network, and potentially learning high-income skills yourself, all within the next few months.

This isn't a dream. It's exactly what we're offering you right now.

We've created an exceptional data analysis and AI skills programme that's currently available at a price so affordable that even high school students can enrol. But here's the thing: **this pricing won't last**. We're intentionally keeping it extremely low right now to make tech education accessible to everyone, but the price will increase significantly after these first cohorts.

This creates a unique window of opportunity—for the students who can access life-changing education affordably, and for you, who can earn substantial income by simply connecting people with something genuinely valuable.

What We're Inviting You To Do

We're looking for motivated individuals who want to be part of something meaningful. Your role is simple: share information about our programme with people in your network who want to learn valuable tech skills.

Every time someone you refer enrolls in the course, you earn **₦1,000**.

Think about that for a moment:

- 30 people = ₦30,000
- 50 people = ₦50,000
- 100 people = ₦100,000

There's no cap. The more people you help reach this opportunity, the more you earn. And you have 3-5 months to do this, working entirely at your own pace.

PARTNERSHIP OPPORTUNITY

Earn While Empowering Others

₦1,000 PER REFERRAL

No cap on earnings • Work at your own pace

3-5 months partnership period

Earn Income

30 people = ₦30,000 | 100 people = ₦100,000

Free Training

Qualify for free courses (40+ referrals)

Gain Experience

Certificate of recognition upon completion

Flexible Schedule

Work on your own time, your own way

APPLY NOW • LIMITED TIME OPPORTUNITY

Why This Is Perfect For You

If you're a university student, you're surrounded by people who want better opportunities. Your classmates, friends in other departments, people in your hostel—they're all looking for ways to improve their prospects. This is something real you can offer them.

If you're active in a church or community group, you know people who want to grow and develop professionally. This is an affordable path to high-income skills that can genuinely change lives.

If you have a strong online presence, you can reach people across Nigeria and beyond who are searching for exactly this kind of opportunity.

If you're simply well-connected, this is your chance to turn those relationships into income while doing something genuinely helpful.

What Makes This Different

Let's be honest: there are lots of courses and programmes out there. So what makes this one special?

It's Genuinely Affordable

Right now, the price is so low it's almost unbelievable. We're talking about the cost of your monthly data subscription. Even high school students can afford it. When was the last time you saw university-level data analysis and AI training offered at this price?

Compare it to:

- Other online programmes charging ~~₦~~50,000-~~₦~~200,000
- University courses requiring years of study and tuition fees
- Bootcamps charging hundreds of thousands of naira

Our price right now is a fraction of these, and the quality matches what they offer.

It's Actually Complete

We're not just teaching a skill and abandoning students afterwards. Our programme includes:

Professional Training: Comprehensive data analysis and AI skills that are in high demand globally

Portfolio Development: Students graduate with actual projects they can show potential employers

Networking: Students connect with others from across Nigeria and potentially the globe, building relationships that can lead to opportunities

Certificates: Official recognition of their skills upon completion

Job Application Support (Optional): For a small additional fee, we guide students through applying to their first 25 jobs

This is everything someone needs to transition into tech, packaged in one place, at an incredibly accessible price. Even federal government programmes don't offer this level of comprehensive support.

It Teaches Skills That Actually Pay

Data analysis and AI aren't just buzzwords—they're the foundation of the modern economy. AI is transforming every industry, and AI runs on data. That means people who can work with data are in massive demand globally.

These are skills that lead to international opportunities and salaries that can genuinely build wealth, not just help someone survive. This isn't like learning a trade that keeps you afloat—this is learning a skill that can transform your entire financial trajectory.

The Timing Is Critical

Here's what most people don't realise: we ran the first cohort completely **free**. Many people said, "I'll join the next one." Now it's not free anymore, and those people missed out.

We're currently still offering it at an extremely low price, but after these cohorts, the price will increase significantly. We're being transparent about this because we want people to act now while the opportunity is at its best.

For you as a partner, this timing is crucial. Right now, when the price is this low, it's easy to convince people to enrol. Everyone can afford it, everyone can see the value. Later, when the price goes up, your job becomes much harder. This is the optimal time to earn the most.

What You'll Gain

1. Income

Every person you refer who enrolls earns you ₦1,000. We've had previous partners bring in around 950 people over three cohorts and earn close to **₦1,000,000**. They were university students who leveraged their networks effectively.

You don't need to match that to benefit significantly. Even 30 people is ₦30,000. Even 50 is ₦50,000. And there's no limit to how many you can refer.

2. Professional Experience

This isn't just about money. You're gaining real experience in:

- Marketing and outreach
- Recruitment and coordination
- Professional communication
- Project completion

You can add this to your CV or resume. When you complete the partnership (bringing in at least 30 people), we'll provide you with an official certificate of recognition proving you worked with us. This is valuable experience that employers respect.

3. Potential Free Education

If you decide to bring in up to 40 people, and at least 5 of those people purchase an additional service from us (like the job support programme), you qualify to learn any skill from our course catalogue **completely free**.

Think about that: you could earn tens of thousands of naira AND learn high-income skills worth far more, all while helping others access the same opportunities. If you bring in 40+ people, you're even more likely to hit that threshold of 5 people purchasing extras.

How Everything Works (Simple & Clear)

We've designed this to be as straightforward as possible. No complicated processes, no hidden steps. Here's exactly what you do:

Step 1: Understand the Opportunity (You're Doing This Now)

Read through this document carefully. Make sure you understand what you're offering people (an exceptional educational opportunity at an unbeatable price) and what you're earning (₦1,000 per enrolled student, plus other benefits).

If anything is unclear, you can contact us through our [website](#). We're here to help.

Step 2: Apply (Takes 2 Minutes)

We'll provide you with a simple [application link](#). It's intentionally easy—just basic information so we can track who's working with us. We're not asking for resumes, portfolios, or complicated credentials. We care about one thing: can you connect people with this opportunity? That's it.

Website: <https://data-analytics-by-christiana.web.app/>

Application link: <https://forms.gle/CmR8E7Fkzc2Kaaw57>

Step 3: Cohort Dates and Timeline (Critical Information)

Let's be clear about timing because this matters for your earning potential.

Cohort 1 starts on 15th March 2026. That's just a few months away.

Anyone who enrolls before 15th March pays the current low price—the one that makes this opportunity so accessible. Anyone who tries to enrol on or after 15th March will pay a late fee, which means a higher price. This isn't arbitrary; it's how we manage our cohort planning.

Here's your timeline as a partner:

You have until the end of April to bring in your minimum 30 people. That's four full months—January, February, March, and April. If you break that down, it's about 7-8 people per month, or roughly 2 people per week.

Is that achievable? Absolutely. Remember the students who brought in 950 people over two cohorts and earned nearly ₦1,000,000? They had the same timeline. You don't need to match their numbers to succeed—30 people is the target, and it's very realistic if you're consistent.

If you bring in 40 people and at least 5 of them purchase an additional service from us (like job application support), you qualify to take any course from our catalogue completely free. That's tens of thousands of naira worth of education, plus the ₦40,000 minimum you've already earned from referrals.

Cohort 2 dates are coming soon. We'll announce them once Cohort 1 is underway, giving you even more opportunities to continue earning if you complete your first target early.

The key thing to understand: the earlier people enrol, the better price they get, and the easier your job becomes. Encourage people to act now while the offer is at its best.

Step 4: Share the Opportunity

Now comes the main part: telling people about the course.

This isn't about aggressive sales tactics or pressuring anyone. It's about sharing something genuinely valuable with people who need it.

Who should you talk to?

- Friends who've mentioned wanting to learn tech skills
- Classmates looking for ways to improve their job prospects
- People in your community interested in personal development
- Anyone online in your network who's career-focused

What should you say?

You don't need a script, but here's the essence of what you're sharing:

"There's this incredible data analysis and AI course available right now at a ridiculously low price—seriously, even high school students can afford it. It's a complete programme with portfolio building, networking, certificates, and even optional job support. The skills they teach are in high demand globally, and people with these skills earn really well. But here's the thing: the price is only this low for the current cohorts. After that, it's going up significantly. So if anyone wants to get into tech or level up their skills, now is the perfect time. I can send you the website if you're interested."

That's it. You're not manipulating anyone. You're sharing a genuine opportunity that people are actively looking for. The course sells itself—you're just making sure the right people know about it.

Step 5: How Payment Verification Works (Read This Carefully)

This is the most critical part of ensuring you actually get paid for your work.

We've designed a system that's transparent and fair, but it only works if you follow the process correctly. Here's exactly how it works:

Step i: Be Present When Your Referral Enrols

When you've convinced someone to join the programme, don't just send them the website link and hope for the best. Be there with them—physically or virtually—or inform them about this part before when they're ready to pay.

Why? Because during the payment process, they'll be asked: *"Who referred you to this programme?"*

They'll have the option to either:

- Write your name and email
- Write just your name
- Select you from a list

If they don't select you or write your name, you don't get paid. It's that simple.

This isn't us being difficult. It's how we verify legitimate referrals and prevent fraud. If someone doesn't indicate they came through you, our system assumes they discovered the programme independently.

Step ii: What Happens After They Pay

The moment someone completes their payment and indicates you referred them, our system automatically sends you an email that says:

"Someone you referred has just enrolled in the programme. We owe you ₦1,000. Please provide your account details."

That email is your confirmation. It's proof that the referral counted and payment is coming.

Inside that email, there will be a link where you can submit:

- Your bank account number
- Your account name
- Your bank name

Important: Use the same account details every single time. Don't send us different account numbers for different referrals. Consistency eliminates confusion and delays. One account, every time.

Step iii: Payment Schedule

We pay you either:

- Every two weeks, or
- When you reach 10 referrals

Whichever comes first.

So if you refer 5 people and two weeks pass, you'll receive ₦5,000. If you refer 10 people in one week, you'll receive ₦10,000 without waiting the full two weeks.

The two-week window exists simply to verify enrolments and process payments smoothly. It protects everyone involved.

Your Target (Achievable and Flexible)

We're asking you to bring in **at least 30 people within 3-5 months**.

Let's put that in perspective. That's about 6-10 people per month, or roughly 2 people per week. If you're in a university with thousands of students, or active in a community with dozens of people you know, this is very achievable.

The previous partners who earned nearly ₦1,000,000? They were university students who worked together and leveraged their networks. They brought in around 950 people across three cohorts. You don't need to match that to succeed—40 people is enough to complete the partnership, earn ₦40,000 minimum, and potentially qualify for free courses.

But there's no maximum. If you can bring in 100, 200, 500 people—you'll earn accordingly. The opportunity scales with your effort and network.

Real Success Story

Let us share something concrete. We had a group of university students who partnered with us previously. They were well-connected on campus, they worked collaboratively, and they genuinely believed in what we were offering.

Over three cohorts, they brought in approximately 950 people. They earned close to **₦1,000,000** together. They also qualified for free courses and gained valuable experience they've since added to their CVs.

This is real. This happened. And it can happen for you too if you're strategic and consistent.

Addressing the Obvious Question: Is This Real?

We understand scepticism. When something sounds this good, people naturally wonder if it's legitimate.

So let's be direct: **This is not too good to be true. It's too good to last.**

Here's what we mean:

Everything about this programme is real:

- The course exists and is comprehensive
- The tracking system works and is transparent
- The payments are processed on schedule
- Previous partners have earned exactly what we've described

But the current pricing and opportunity window won't last forever. We're intentionally keeping the price extremely low right now to make tech education accessible. Once we've reached a certain number of students, the price will increase to sustainable levels.

When that happens, this partnership opportunity either becomes less attractive (because convincing people to pay higher prices is harder) or may not be available at all.

We're not creating artificial scarcity to manipulate you. We're being honest about our pricing strategy. Right now is genuinely the best time to participate.

If you have doubts, here's what we encourage:

- Visit our [website](#) and explore the course information
- Find out about the cohort dates in the [google application](#) form
- Contact us with questions through the [website](#)

We want you to feel confident about this, because when you're confident, you share the opportunity authentically, and everyone benefits.

What We Don't Accept (Important to Know)

This partnership is built on trust and integrity. To keep it that way, there are a few things we absolutely cannot tolerate:

- 1. Dishonesty or Misrepresentation:** Don't make false claims about the course. Don't exaggerate what we offer or promise things we don't provide. Share accurate information based on what's in this document and on our website.
- 2. Spam or Harassment:** Respect people's boundaries. If someone says they're not interested, that's okay. Move on. Don't flood inboxes, don't harass people, don't be pushy. This opportunity is attractive enough that you don't need aggressive tactics.
- 4. Unauthorised Promises:** Don't offer discounts or special deals we haven't authorised. The pricing is set, and everyone should pay the same amount. Don't try to negotiate on our behalf.
- 5.** If you violate any of these terms, you'll be removed from the programme immediately and whatever you've earned will be paid to you in two weeks. We don't want to do that—we want this to work for everyone—but we have to maintain integrity.

Questions You Might Have

"How do I get started right now?"

Read this document completely, click the [application link](#) we'll provide, fill out the brief form, and then begin getting your referrals. You could literally start within 24-48 hours.

"Do I have to pay anything to join?"

No. This partnership is completely free to join. You don't pay us anything—we pay you.

"What if I don't reach 30 people?"

You'll still earn ₦1,000 for every person you did refer. The 30-person minimum is for completing the full partnership contract and qualifying for the certificate and potential free course access. But your referrals are still valuable even if you don't hit 30.

"Can I do this while studying or working?"

Absolutely. This is designed to be flexible. You work on your own schedule, at your own pace. Many of our previous partners were full-time students who did this on the side.

"How do I know I'll actually get paid?"

The Critical Warning: No email = No payment.

If your referrals don't select you during the payment process, we won't send you an email. And if we don't send you an email, we can't pay you—because we have no record that you referred them. It takes them five seconds. It earns you ₦1,000. We understand you might want to verify we're legitimate before putting serious effort into this. That's completely reasonable.

Here's what we encourage: Wait to get your first email when your first referral pays. You can be physically there to confirm this.

"Can I take the course myself for free?"

Yes, if you meet the criteria: bring in up to 40 people, with at least 5 of them purchasing an additional service from us. Then you can choose any course from our catalogue to take for free.

"What happens after the 3-5 month period?"

If you've completed your target (30+ people), the contract ends. You receive your final payment, your certificate of recognition, and any free course access you've qualified for. If you want to continue working with us, we can discuss future opportunities.

"Why should people trust me when I share this?"

Because you're sharing something real and valuable. Direct them to our website where they can see everything for themselves—course info, details and testimonials. You're not asking them to trust you blindly; you're giving them information and letting them make their own decision.

"What makes you different from other online courses?"

Most courses teach skills but leave students to figure out everything else—portfolio building, job hunting, networking. We provide the complete package. Plus, our current pricing is unmatched. Challenge people to find a comparable programme at this price—they won't.

"Who do I contact if I have problems or questions?"

Visit our website and click "[Contact Us](#)" in the top menu. One of our partners will respond and help you with whatever you need.

"Will I get support and guidance as a partner?"

Yes. This document is your primary resource, but if you need clarification or have specific situations you're not sure how to handle, you can reach out to us. We want you to succeed.

The Urgency Is Real (But Not Manipulative)

We need to be clear about something: the urgency around this opportunity is genuine, not a marketing tactic.

When we first launched this course, it was free. Many people told us, "I'll join the next cohort." Now it's no longer free. Those people missed their chance at a completely free education.

Currently, the price is still incredibly low—affordable for almost anyone. But it won't stay this way. After these first few cohorts, we're raising the price to sustainable levels. This is not a threat or a manipulation—it's a straightforward business decision.

For you as a potential partner, this matters because:

Right now, convincing people to enrol is easy. The price is low, the value is obvious, almost anyone can afford it.

Later, when the price is higher, your job becomes significantly harder. People will hesitate more, you'll face more objections, and you'll need to work harder for each enrolment.

Plus, this specific partnership opportunity may not be available once we raise prices and shift our growth strategy.

So when we say "act now," we're not trying to pressure you unfairly. We're being honest about the optimal window. You can join later, but the conditions won't be as favourable.

Your Next Step

If you've read this far, something about this opportunity resonates with you. Maybe it's the income potential. Maybe it's the chance to gain experience. Maybe it's the possibility of learning valuable skills yourself. Maybe it's simply wanting to help people access something valuable.

Whatever your reason, the next step is simple:

Make a decision.

If this isn't for you, that's completely fine. Not every opportunity is right for everyone.

But if this does appeal to you—if you can see yourself doing this, if you have access to people who would benefit from this course, if you want to earn some income over the next few months—then don't wait.

Click the [application link](#). Fill out the brief form. Start sharing the opportunity.

Three months from now, you could have earned ₦30,000, ₦50,000, ₦100,000, or more. You could have a certificate of professional recognition. You could have access to free high-income skill training. You could have experience you can leverage for future opportunities.

Or three months from now, you could be in the exact same place you are right now, wondering if you should have tried.

The course will still exist in three months, but the price will be higher, the partnership terms might be different or unavailable, and the window of optimal opportunity will have closed.

We're offering you something real, something valuable, and something time-sensitive. What you do with that is entirely up to you.

Ready to Begin?

Visit our [website](#) to explore the course and understand exactly what you'll be sharing with people.

When you're ready to apply, click the [application link \(provided separately\)](#), complete the brief form, and begin your first journey with us.

If you have any questions before applying, use the "[Contact Us](#)" option on our website. One of our partners will respond and help you with whatever you need to know.

We're excited about the possibility of working with you. This programme works best when partners genuinely believe in what they're sharing, and we think once you understand the full picture, you'll see why this is special.

Let's make something great happen—for you, for the students you'll help reach, and for everyone's future.

Segun Jones

Data Analytics Empowerment Team

P.S. — Remember: The students who partnered with us before and earned nearly ₦1,000,000? They started exactly where you are right now—reading this information and deciding whether to try. They decided to go for it. That decision changed their financial situation in just a few months. Yours could too.
